

Due to the Coronavirus pandemic, drug and alcohol treatment providers are facing challenges to continue services. However, many, if not most, support services continue. Some federal, state and local regulation and requirements have been relaxed to allow for continuation of services during the pandemic with an abundance of caution.

Below is a description of current local services.

Please contact the service provider for additional information and updates.

Residential Treatment Providers

Residential treatment providers are still accepting new patients. For most providers the intake process has been lengthened to include more personal health questions. Some transportation drivers will take client temperatures before allowing individuals to get into their vehicles. Some residential treatment providers are housing new admissions in isolation for 14 days prior to integrating new patients with the rest of the community.
