Pink Pills

Good & Plenty Candies

Keep Your Medications Safe

NEVER:

- Share your medications with someone else
- Put something in your mouth that looks like candy without asking a parent/guardian
- Take medicine unless it is given by an adult

ALWAYS:

- Keep pills in their original containers, so they don't get mistaken for candy
- Store medicines and vitamins out of reach of younger children, or in a lockbox
- Take medicine as prescribed by the doctor
